DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, 20-21, drawn to a system/method of a stereoscopic liquid crystal eyewear, classified in class 345, subclass 8.
 - II. Claims 22-35, 63-68, 90-95, 96-97, drawn to a light shutter control apparatus/circuit, classified in class 348, subclass 56.
 - III. Claims 36-62, 69-71, 72-89, 98-107, drawn to a stereoscopic viewing system, classified in class 348, subclass 51.
 - IV. Claims 108-114, 115, drawn to an apparatus for detecting computer images and to control a display in accordance to said detection, classified in class 345, subclass 30 and/or 680.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because for example, the combination which includes stereoscopic viewing may be achieved through techniques other than light shutter controls, and stereoscopic viewing may be viewed through means other than LC eyewear. The subcombination has separate utility such

as for example, a light shutter control apparatus that may be applied to applications other than stereoscopic systems.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. In the event that applicant elects Group I, this application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Species 1, fig. 2
- b. Species 2, fig. 3
- c. Species 3, fig. 4
- d. Species 4, fig. 6

5. In the event that applicant elects Group II, this application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Species 1, fig. 5A
- b. Species 2, fig. 8A
- c. Species 3, fig. 9

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. A telephone call was made to Mr. Warren Sklar on June 2, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu Le whose telephone number is 703-308-6613. The examiner can normally be reached on M-F 8:30-6:00.
